

KALINGASTONE

ENGINEERED SURFACES

MARBLE COLLECTION

A legacy of stone,
lived through moments that matter

QUALITY THAT ENDURES.
TRUST IN EVERY DETAIL.

KalingaStone is built on a foundation of craftsmanship, precision, and a deep understanding of stone, creating surfaces that balance natural character with modern engineering.

In a short span, it has become a trusted name across residential, commercial, and institutional spaces worldwide, chosen for its visual appeal, consistency, and durability.

Backed by strong manufacturing capabilities and a commitment to quality, KalingaStone continues to grow as a global brand, defined by innovation and reliability.

GLOBAL PRESENCE. TRUSTED WORLDWIDE.

KalingaStone has grown into a globally trusted brand, shaping spaces across continents through engineered surfaces defined by craftsmanship, innovation, and enduring quality.

Chosen for residential, hospitality, commercial, and institutional projects, its collections bring aesthetic excellence and dependable performance.

Backed by decades of expertise and a growing international presence, KalingaStone continues to build lasting partnerships and shape spaces that stand the test of time.

140+ Million
Sq. Ft. Installed Globally

A reflection of sustained trust and consistent performance across projects.

1+ Million
Living Spaces Curated

A reflection of thoughtful design integration across homes worldwide.

67+ Countries
Worldwide Presence

Specified across residential, commercial, and institutional spaces worldwide.

India's Largest Exporter
of Quartz Surfaces

A strong international footprint built on scale, precision, and reliability.

EXCELLENCE BY DESIGN. BUILT FOR CONSISTENCY.

A foundation driven by advanced manufacturing, skilled expertise, and continuous innovation. KalingaStone surfaces are developed to deliver consistent quality, precision, and reliability across projects of every scale.

With integrated production capabilities and a focus on process control, each surface is engineered to meet the demands of modern architecture and high-performance environments.

Backed by rigorous quality standards and material innovation, every collection is developed to deliver refined aesthetics, structural integrity, and long-term value across residential, commercial, and large-scale architectural applications.

60-Acre Advanced Manufacturing Facility

Large-scale, integrated production ensures consistent quality and supply continuity.

8 State-of-the-Art Production Lines

Cutting-edge technology across dedicated lines ensures precision, efficiency, and scalability.

Dedicated R&D by Stone Experts

Continuous innovation enhancing durability, finish, and performance.

2,100+ Skilled Professionals

Specialised teams ensuring precision across design, engineering, and quality control.

500+ Designs Across Marble, Quartz & Terrazzo

Extensive design versatility for diverse architectural and lifestyle needs.

99.9% BACTERIA-RESISTANT SURFACES

KalingaStone surfaces are designed for everyday use across residential, commercial, and shared environments, where hygiene and durability are essential.

With embedded MaxGuard technology, they help inhibit bacterial growth, supporting cleaner and more hygienic surfaces without affecting appearance or finish.

Engineered for everyday living, they combine hygienic protection with easy maintenance and lasting confidence across a wide range of applications.

Clinically Tested
using ISO22196

The MaxGuard Advantage

99.9% Bacteria Resistant

Built-in MaxGuard protection works continuously, inhibiting bacterial growth at all times across surfaces.

Stain & Odour Resistant

Designed to repel everyday spills and prevent odours, even in demanding, high-use indoor spaces.

Lifetime Durability

Antibacterial protection is embedded within the material, remaining effective throughout the product's lifespan.

Food Safe & Chemical Resistant

Safe for direct food contact and engineered to withstand cleaning agents and disinfectants under frequent cleaning.

Embedded Antibacterial Protection

Unlike topical coatings that wear away, MaxGuard™ infuses protection into each slab during manufacturing. This molecular-level integration ensures continuous, 24/7 bacterial inhibition—right where growth begins. The result is safer, cleaner environments that require less maintenance and deliver peace of mind for years to come.

*MaxGuard technology is globally registered and approved for contact with food, making it safe for a variety of applications.
*MaxGuard Technology is available as an optional feature and can be applied to marble slabs based on client requirements, project specifications, and order confirmation

FEATURES THAT MATTER. BUILT FOR EVERYDAY USE.

KalingaStone surfaces are engineered with features that support durability, hygiene, and everyday functionality across a wide range of residential and commercial applications.

Each surface is developed to simplify maintenance, support hygienic environments, and deliver reliable, long-lasting performance across diverse architectural applications.

Designed for sustained use, these surfaces offer low maintenance, efficient installation, dependable performance, and refined aesthetics across residential and commercial spaces of every scale.

Core Attributes

Low Water Absorption

Engineered with low water absorption properties to help resist moisture penetration, stains, and everyday spills, ensuring enhanced durability and long-lasting performance.

Exceptional Durability

Manufactured with vibro-compression, surfaces offer superior strength and durability for commercial spaces.

Easy Care & Maintenance

Designed to fit busy lifestyles with easy, low-effort cleaning and simplified daily upkeep routines.

Hygienic Surface

Maintains a clean and hygienic surface through its smooth finish, making it suitable for kitchens, bathrooms, and other frequently used spaces.

Enduring Quality

Manufactured using controlled formulations, surfaces maintain colour, structure, and finish over time.

Ease of Installation

Available in standardised sizes, slabs can be fabricated for seamless installation across applications.

Environmentally Responsible

Manufactured using optimised resources, KalingaStone delivers durable, long-lasting performance.

Quality & Warranty

Every KalingaStone slab delivers consistent performance with MaxGuard technology, backed by a warranty.

Surface Preservation

Crafted for lasting durability and elegance, retaining its appearance through years of everyday use.

SEAMLESS SURFACES. TIMELESS IMPRESSIONS.

KalingaStone surfaces are crafted to bring seamless luxury and refined aesthetics into modern spaces through oversized marble slabs.

Their expansive dimensions create uninterrupted visual flow, enhancing interiors with a sense of openness, sophistication, and architectural harmony.

Engineered with the strength and consistency of marble, these surfaces offer superior durability, low porosity, stain and scratch resistance, ease of maintenance, and long-lasting performance. Combined with refined finishes and timeless appeal, they transform spaces into bold expressions of style, functionality, and craftsmanship.

Key Properties

Safe & Hygienic

Made with high-density composition, surfaces resist liquids and impurities, ensuring stability.

Homogenised Body

Crafted with a uniform composition, ensuring consistent strength, durability, and colour throughout the slab.

Heat Resistant

Engineered to resist everyday heat exposure, helping maintain its beauty and durability during normal residential and commercial use.

Stain Resistant

The non-absorbent surface allows cleaning, maintaining appearance without sealing or specialised treatments.

Scratch Resistant

Engineered mineral composition resists scratches and abrasions for consistent long-term surface performance.

Long-Lasting Finish

Crafted to preserve its refined finish and premium appearance through years of everyday use.

Marble Polished Slab Dimensions

CLASSIC CRYSTAL | EMPERADOR CHIARA

**ENGINEERED MARBLE.
TIMELESS. CONSISTENT.
RELIABLE.**

Engineered marble is created by combining natural marble aggregates with advanced resins, delivering surfaces that retain the visual appeal of marble with improved strength and dimensional stability. Controlled manufacturing ensures consistency in colour, pattern, and finish across every slab.

Designed for durability and ease of maintenance, these surfaces offer low porosity and resistance to everyday wear, making them suitable for both residential and commercial applications.

ARTISAN EDITION

Crafted with character and depth, the Artisan Edition celebrates marble surfaces shaped through expressive textures, intricate movement, and refined detailing. Each surface reflects a distinct sense of artistry, where natural variation and layered compositions come together to create warmth, individuality, and timeless sophistication. Designed for spaces that value authenticity and design depth, the edition brings together artisanal craftsmanship with enduring contemporary appeal.

ROMOLO

ENGINEERED TO PERFORM. DELIVERED WITH PRECISION.

KalingaStone Prefabricated Solutions are developed to streamline design-to-installation workflows through factory-controlled processes, ensuring accuracy, consistency, and reduced on-site complexity across projects.

From modular countertops to seamless wall panels and claddings, pre-fabrication enables faster execution while maintaining uniform finish quality and minimising installation variability.

Designed for large-scale and time-sensitive projects, these solutions support efficient project delivery with reduced dependency on site conditions, labour, and time-intensive processes.

Why KalingaStone Pre-Fab

Factory-finished precision

Ensures uniform quality across surfaces and consistent finish outcomes.

Faster installation

Reduces on-site errors and significantly improves overall execution efficiency.

Reduced site impact

Minimises dust, noise, and significantly lowers overall labour dependency on the site.

Cross-sector adaptability

Suitable for diverse residential, commercial, and architectural applications.

Project scalability

Suitable for fast-track and large-scale projects across varied applications.

Designed for High-Performance Environments

Retail

Boutiques | Flagship Stores | Malls | Experience Centres

Surfaces support environments with refined aesthetics and performance.

Healthcare

Hospitals | Labs | Clinics | Diagnostic Centres

Non-porous, hygienic surfaces engineered for environments where cleanliness and durability are critical.

Hospitality

Hotels | Resorts | Spas | Banquets | Business Centres

Material solutions that balance visual appeal with durability across guest touchpoints.

Preferred for Large-Scale Projects

Flexible production capabilities support seamless execution across projects.

Consistent manufacturing processes ensure uniform quality across large volumes.

Reliable supply and coordinated delivery timelines support efficient project planning.

ENGINEERED FOR FAÇADES. BUILT FOR PERFORMANCE.

KalingaStone surfaces are developed to meet the structural, environmental, and performance demands of façade applications, ensuring durability, consistency, and long-term reliability across exterior conditions.

Manufactured under controlled processes, they deliver uniform quality, low porosity, and dependable resistance to weathering, making them suitable for diverse climatic environments.

Designed for sustained exterior use, these surfaces provide architectural flexibility, weather resistance, and ease of maintenance across diverse environments.

Structural Reliability

High resistance to impact, wear, and structural stress loads.

Design Flexibility

Wide range of textures, aggregates, and finishes for façade expression.

Weather Stability

Low porosity effectively resists moisture and temperature variation.

Low Maintenance

Engineered composition effectively minimises staining and upkeep.

Sustainable Choice

Manufactured to support green building requirements.

CRISTALLO

**VERSATILE BY DESIGN.
ADAPTABLE TO EVERY SPACE.**

KalingaStone surfaces are developed to adapt across a wide range of environments, complementing diverse architectural styles and functional requirements.

Their versatility enables effortless integration into evolving spaces, supporting changing design needs without compromising aesthetics while retaining a refined and enduring visual appeal.

Designed for varied applications, these surfaces deliver durability, ease of maintenance, and dependable performance across residential and commercial environments, offering the flexibility to create cohesive spaces that stand the test of time.
